

## EDDIE BAMFORD

Twenty years ago Eddie Bamford was recommended to me to construct the foundations, site slab and cavity walls of a sizeable extension to my own home.

Since then he has carried out further building work for me in a good and competent manner, including stonework repair and repointing at Fairhaven Methodist Church.

More recently I recommended Eddie to a retired architect for repair work needed at his own house. Boundary walls & retaining walls were in part replaced, repaired and recapped meeting the requirements and specification of someone with a long history in building construction.

I have found Eddie Bamford to be a pleasant and reliable worker who is familiar with building regulations.
